EXECUTIVE SUMMARY

I am Kamalesh, AI & Backend-focused engineering student with hands-on experience building scalable APIs, real-time systems, and AI-powered applications. Passionate about applying AI in impactful domains like healthcare, with experience in document intelligence (RAG pipelines), real-time collaboration systems, and backend architecture. Strong focus on clean code, system design, and solving real-world problems.

WORK EXPERIENCE

Data Science Intern (In-plant Training) at Computational Intelligence Research Foundation | Jul 2024

- Worked on real-world datasets, performing data cleaning, analysis, and insight generation
- Applied core data science and computational intelligence techniques to solve practical problems
- Collaborated on analytics tasks, focusing on structured problem-solving and data-driven decisions

Artificial Intelligence Intern at Retech Solutions | Jan 2025

- Developed and deployed a facial recognition system for access control as the primary project
- Implemented and evaluated AI/ML models for accurate and reliable face detection and identification
- Conducted independent research and optimization under mentorship to improve model performance

PROJECTS

DocuQuery – AI Document Q&A System

Tech Stack: Python, FastAPI, Ollama (Llama3), SentenceTransformers, ChromaDB

- Built an AI-powered document assistant enabling PDF ingestion and natural language querying using a RAG pipeline.
- Implemented semantic search with SentenceTransformers + ChromaDB to generate context-aware answers using Ollama (Llama3).

AI-Powered Product Quality Analyzer

Tech Stack: Python, FastAPI, Pandas, Scikit-learn, LangChain, ChromaDB, OpenAI/Gemini/Ollama, SQL

- Built an end-to-end AI system integrating fragmented datasets (reviews, returns, sales, manufacturing) for EDA, sentiment analysis, and predictive modeling.
- Developed a RAG-based conversational AI with LangChain + FastAPI enabling natural language queries, cross-data insights, and automated alerts.

EDUCATION

2023 - 2027	Bachelor of Technology Degree at SEC(AI&DS)	(8.17%)
2023	Class 12th State Board (CS)	(87%)
2021	Class 10th State Board	(All Pass)

SKILLS

- Programming: Java, Python, C
- Backend & Frameworks: Node.js, Express.js, FastAPI
- AI/ML: LLM Integration, RAG, SentenceTransformers, Ollama
- Databases: PostgreSQL, Supabase
- Tools & Platforms: Git, GitHub, Linux (Ubuntu), Azure, Oracle Cloud (OCI)

CERTIFICATIONS

- Oracle Cloud Infrastructure – Foundations Associate, AI Foundations
- Microsoft Learn – Azure AI & Cloud Fundamentals
- HP – AI Foundations
- Winner – Grill & Skill Event, Chennai Institute of Technology
